Construction (Design and Management) Regulations

Design risk assessments are carried out throughout the design stage of this project in accordance with company procedures and manuals. Where reasonably possible all areas of risk applicable to design and end use of the construction have been identified and then eliminated, mitigated or recorded as a residual risk. Note that general risks of which a competent designer or contractor should be aware are not included. This drawing is to be read in conjunction with the construction information and all related documents prepared in accordance with the current Construction (Design and Management) Regulations 2015 and all applicable Health and Safety legislation as currently amended.

Red Line Boundary

Fibre Reinforced Concrete Hardstanding for laydown of scrap material

Mesh Reinforced Concrete Hardstanding for laydown of scrap material

Indicative Drainage Connection

1
A-90105

Existing Road

+6.65m

Access gradient not to exceed 1:10

Hardstanding Access

Fibre Reinforced Concrete
21200 m²

6.500m at highest point
Indicative 1:60 falls across all hardstanding to drainage channels

Mesh Reinforced Concrete
5400 m²

Indicative Drainage Pumping Station

Indicative Pollution Control Device
