Planning Reference No: P2018/0173

In relation to **planning condition 7** we have undertaken the requested CCTV survey of the existing surface water sewers and provide a report, dated 25th Feb 2020.

The information in this document is to be read in conjunction with the aforementioned report.

Please note, on inspection it was determined that a blockage within MHS3 (situated outside the boundary of our site) has resulted in further blockage to the section of pipe between MHS2 and MHS3 and also partially between MHS1 and MHS2 (both within the boundary of our site). The blocked areas have been highlighted in **red** in Figure 1 below.

Should further survey work be required, the blockages identified and referred to above would need to be removed.

All of the above are deemed to be in NPT ownership, with surrounding gully's discharging water into the network from NPT adopted roads.

Should you require any further information, please get in touch.

Kind regards

Alex Holland
