

Canine Activity Centre

We would love this place to be the hub of the community, A place where like-minded people can meet with their beloved dogs in a safe, friendly and fun environment. We want to offer a quality, personalised service that is adaptable to cater for individual needs for people and their pets.

The centre will be an indoor exercise area offering professional dog training classes, grooming facilities and workshops on a variety of training, including canine first aid and animal assisted therapy. We will also include a dog walking, pet sitting and doggy day-care facility. We plan to offer a pick up and drop off service when needed. The centre will offer sociable events for the community such as organised walks around the stunning Afan Valley.

Here are some links to similar businesses: (We are located midway)

We will be expecting to achieve a turnaround of 10/15 dogs per day, due to this amount we will have in place a professional disposal of the animal matter and an area designated to the sanitation for humans.

We aim to offer a unique service, Hosting designated mornings that reach out to the more vulnerable in our community. Including elderly people, people with mental health issues or special needs and lone parents.

Recognizing the benefits of interaction with dogs in a safe place, the centre will offer a safe haven with qualified staff who will work together to provide a relaxed environment to enhance the wellbeing of our community people and their love of animals.
