

Application for Full Planning Permission

New Community Church Building in Ynysmeudwy, Pontardawe

Land Contamination Report

To the best of our knowledge the site has never had been used for industrial purposes, however, a company has been engaged to perform the requisite land contamination tests.

These tests have had to be delayed due to the discovery of reptiles on site.

To avoid the disturbance of the reptiles it has been agreed by the NPT Planning department that this testing will be performed after the reptile's removal and will form part of the conditions of planning acceptance.

Date 6th July 2020
