

### Soffit Bat Box

Unique to Wildlife, the soffit bat box utilizes the wasted space above the soffit on a standard roof structure. The entrance is formed by cutting away a 20mm slot in the back of the soffit board against the external wall, and a specially designed plate is then screwed through into the bat box to secure it and to create a tidy finish. Virtually invisible, and self-empting, this product provides a permanent and successful solution to the problems of fixing ugly concrete structures to the outside of new housing.

*Soffit Bat Box  
Provide a instant live to proposed dwelling.*

More favourable positions:

Gables without obstructions such as trees  
Positions not exposed to driving rain  
South-facing walls are acceptable for internal nest boxes

*Bird Nesting Housing to Gables.*
