

## Ecology Enhancement

### Ty-Canol Farm, Neath, SA10 7AY.

#### In conjunction with planning application for new agricultural building.

The proposal is for a 75sq.m. lean-to extension agricultural stock building on a smallholding. The area around the site is ideal for ecology sustainment. But in the interest of enhancement, therefore, it would be beneficial in ecology terms to support the habitat of such creatures by adding support features to the building scheme.

It is proposed that 2No. classic RSPB type nesting box be installed between at high level on the East and North facing elevations of the proposal.

#### RSPB Classic nest box

Simply styled, sturdily made FSC ® certified timber nest box. Like all our nest boxes, it's made with thick timber for insulation with a roof designed to prevent rain water running down the inside of the box. The 32mm entrance hole, makes it suitable for many bird species.

##### **Type of bird**

Coal tit  
Blue tit  
Great tit  
House sparrow

#### **Proposed positioning of nest boxes**
