

Llys Wern III – Designated Delivery Route

LBS Neath will be our main building supplier. Their delivery route is contained in the first graphic on the attached.

For all other suppliers I have mapped a route from junction 43 of the M4 contained in the second graphic.

As with Llys Wern II we have looked to avoid the college traffic/student crowds as well as the narrow low bridge with Caewern.

Upon attending site we will have a designated banksman directing the delivery (as per our TMP) and have front loaded our delivery programme with the driveway infrastructure to enable delivery lorries to drive right onto the site to avoid any conjunction in the existing Heol Llwyn Cellyn turning circle.
