Attach or identify specific controls required from COSHH risk assessment									
Permit required (tick below)									
8-	Permit to work (general)		Permit to enter (confined spaces)		Permit to dig				
A.3	Hot-work permit		Out of hours work permit		Other				
Details of person issuing permit									
Description of safe method of work									
(Where appropriate include information such as sketches, details of significant risk control, sequence of works, etc.)									

1. Moving on to site

Day 1 of site becoming our control

Full welfare, site toilets, correct signage site gates, any relevant safety features will be put in to place by cox personnel
At this time a safety meeting will then take place before any work commences to make sure this is within cdm regulations with management before any machinery arrives to site

2. Operating on site

Day 2 removal of site wall to make way for the volvo 140 to make its way in to the working grounds this will for a day or 2 be clearing all brash and bushes no rubble will be disturbed during this time just a site clearance at this stage this machine will not be moved without a certified banksman with a ce approved radio to hand radio checks will commence every 10 minutes once site is cleared we will then tip approx. 20 tons 6R2 certified stone to make a hard standing for the waste bins and make a safe pad for off road parking all bins will now be delivered to site ready for the soft strip vehicles are to approach site @max of 10mph and not move within the street without the banksman and radio

3. Soft strip

All bins are now in place a full site induction will occur chosen people of the team will be allocated to upstairs down stairs concentrating on removal or all wood from the house followed by general waste and then plasterboard all staff are fully certified in asbestos awareness and are 100% aware of the working practice if we come across any of it in our day to day soft strips all going well this will take approx. 3 days for a safe and accurate strip all waste will be stowed in the bins throughout the working day by chosen carriers all bins will be a min of 5 meters away from the building at all times for fire risk reasons each day no waste will be left in or outside of the property also for fire reasons once soft strip is completed all staff will leave site the way they left no rubbish or debris to be left on site wheelie bins will be provided on site to stop this

4. Demolition day

Demolition day will be the day we demolish the now freestanding building before this happens we will have a detailed walk about to make sure that there is no danger to public or any waste or debris once this has been established 4x safety men will stand on each corner and 1 on the access all with radios channel 4 once all 4 give the green light I will then start my dust cannon water suppression unit to damp building down then move the machine to front of the property where I will make my way in to the building removing the outside walls then once down I will then make my way to demolish the out buildings that are separated to the side of the property if at any given time I hear stop stop I will immediately pull the isolation lever on the left hand side of the excavator and then reply on channel 4 to see what the danger is once plot is completely down all rubble will be pulled up in to one stock pile ready to be loaded on to cox vehicles and removed to our fully licensed waste transfer station in Pyle

5. Leaving site

Site is now complete the site will be left in 1 level full site will be graded and tracked in leaving no trip fall hazards or any dangerous areas once machinery is then removed from site a full site clearance will be done all bins to be removed site toilets and welfare will be last to leave site gates will remain for next contractor to go on and do groundworks etc

SIGNED.....

1. **Management on site**

Management on site will all be lead to site manager tony cox

2. **Emergency exit (fire on site)**

If we must take an emergency exit strict guild lines follow these will be properly imposed on site induction fire on site if these was a fire on site we all know our personal boundaries first to identify a fire is to sound out fire fire fire and make your way to the muster point which will be the car park in front of scaffolding at this point you will then call 999 under no circumstances is the scaffolding to be used as a fire exit as there is not sufficient access or escape as all scaffolding is sealed off 1st out is to take a head count of cox personnel a register will be kept daily if this to hand please get it we will not be going in to get your phones personnel belongings until we know 100% safe

These rams were written by tony cox site manager @ coxskip&wastemanagmentltd

This plan is a set plan for this particular job we always keep within this plan each above item will contain its very own risk assessment for set items enclosed.

Tools, plant and equipment	
Type	Details of inspections/test certificates
Excavator and loader	Lola certied
Hand tools shovels etc.	Used
Cutting tools	Used tagged and serviceable
P.P.E.	New packaged

A copy of this briefing register must be attached to the method statement, together with other relevant information (e.g. the associated risk assessments, permits or COSHH assessments).

Supervisor in charge of the work

Note: it is important that you test the operatives' understanding and assume they have read and understood the method statement and risk assessments.

Name	Position	Signature	Date
Tony Cox			2019

Operatives/workforce carrying out the work

I understand and will agree to adhere to the contents of this method statement and the associated risk assessments. I have attended a site induction/briefing that explained the general site rules and necessary site specific arrangements.
