

PLANE OFF EXISTING SURFACE COURSE. APPLY THICK COAT
LAY 45mm HIGH STONE CONTENT, HOT ROLLED ASPHALT SURFACE
COURSE 55/14/68 PGV, 14mm STONE SIZE, 55% STONE
PENETRATION GRADE (BS EN 12419:4)

CARRAGEWAY RESURFACING

50mm THICK PRECAST BLISTER
PAVING SLAB TO DET. DOCUMENT
GUIDANCE ON THE USE OF
TACTILE PAVING SURFACES* 2002

TACTILE PAVING – BLISTER SLAB UNITS

TYPICAL FOOTWAY CROSS-SECTION

FOOTWAY CONSTRUCTION				
LAYER	CLAUSE	MATERIAL	BINDER	THICKNESS
SURFACE COURSE	912.	CLOSE GRADED MACADAM 10MM ACG.	10% ₅₀ PEN	30mm
BINDER COURSE	906.	DENSE BINDER 20MM ACG	10% ₅₀ PEN	50mm
SUB-BASE	803 & TABLE 7.	TYPE 1 MATERIAL	N/A	100mm

BN/BN3 TYPE KERB

EF TYPE FLAT TOP EDGING

- Surfacing materials and thicknesses to be:
- Continuous with either:
 - Proposed adjacent materials in contract drawings; or
 - Existing pavement materials where proposed resurfacing not required;

- or, where the above are not specified:
- Surface Course
 - Binder Course

ONE WAY DUCT FOR FOOTWAY

- Surfacing materials and thicknesses to be:
- Continuous with either:
 - Proposed adjacent materials in contract drawings; or
 - Existing pavement materials where proposed resurfacing not required;

- or, where the above are not specified:
- Surface Course
 - Binder Course

TWO WAY DUCTS FOR CARRAGEWAY

Signal Pole Housing Installation Details

- Compact a 75mm layer of granular stone in the base of the excavation.
- Place the RS115 in the required location, ensuring that there is at least 20mm clearance to the surround and the drainage duct is not pinched or obstructed.
- Ensure the two stainless steel bolts do not obstruct the traffic signal post from entering the socket.
- Connect the traffic signal ducting (if used) to the socket.
- Insert the Stainless Steel Sleeve prior to placing the Sub Pole into Socket and tighten the two stainless steel bolts against the sub pole. Using the sub pole ensure the pole is in a vertical position.
- Cast concrete with the lid locked in position and compact using a vibrating poker. Fill the concrete to a level to allow for the surrounding surfacing. The concrete should be at least S14/S25 mix.
- Check the post is vertical and finish.
- The Socket should be left for the Electrical contractors with the pedestrian plug and stainless steel sleeve in position.
- For further information see Oversewing Organisation.

NAL Controller Base for outcrose (all dimensions in mm)
