Subject: RE: Enquiry Kevin Tobin

Good morning

Thank you for your enquiry, we don't manufacture the tank ref Con12, however I can provide details of a 10,000 Steel Fuel Station we do manufacture.

Integrally bundled, static storage tanks, rectangular, above ground.

The bulkhead is fitted in front of the storage tank providing the area in which tank filling and dispensing equipment is housed.

Built generally to BS799:5-2010, Type J (Oil Burning Equipment) and to recommendations made in Oil Storage Regulations for Businesses' (Environment Agency & Department for Environment, Food & Rural Affairs, England and Wales, 2018) an GPP2: Above Ground Oil Storage Tanks (Scotland and Northern Ireland) .
Air pressure and visual test to 0.2 Bar to tank and bund Tank internally braced, tank plates fully welded internally and externally, additional bund bracing with bund fully welded internally and externally.

Tank

Required Capacity: 10,000 Litres

Ext Dims (inc 600mm deep fill point cabinet) Long: 4000mm Wide: 1830mm H: 18330mm (exc. Floor channels and lifting lugs) Mild Steel: 3mm (BS EN 10025) Front cabinet with either steel access door or roller shutter door 2" Fill point assembly with drip tray, isolation valve, cap and chain

Paintwork: Zinc phosphate paint Std colour Mid Holly Bush Green Raised Boltdown manway Earthing bolt 2" tank to bund breather 2" bund vent and cap 1" Top suction 2No 2" return ports on top 2No 1.5" ports for gauges etc 240v Piusi Cube 56 pump set, inc flowmeter, 4m diesel dispensing hose, auto shut off nozzle

Optional

Roller shutter access door
Displacement Dispensing pump (s)
Base feeds (if required)
Overfill prevention valve
Gauging and monitoring equipment
Filters
Automatic Hose reel
Fuel conditioning units
Bund Contents gauge
Other options available

Kind regards

Alex Mackie
