

Garden Outbuilding

Grandchester Cottage, St David's Park, Margam

Biodiversity Proposal

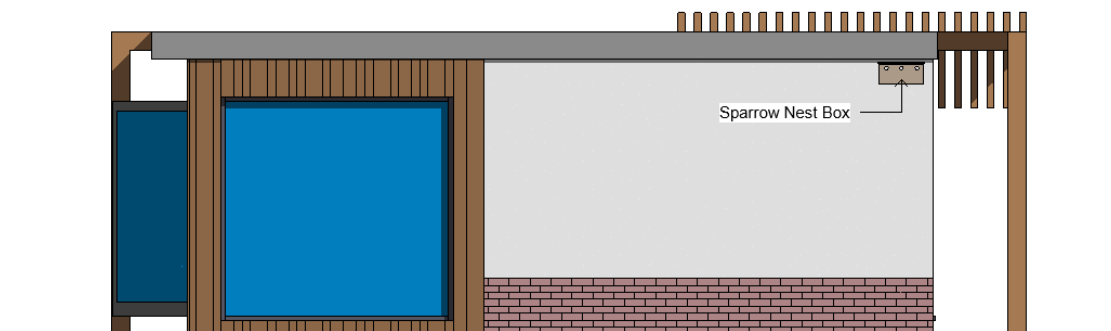

Whilst the proposed Outbuilding does not reduce or remove any potential habitats (apart from some existing amenity grassed space), it is recognised that we need to improve upon existing habitats and provide increased biodiversity as part of the project.

We propose to install 1nr. sparrow terrace nest box with 3 sub-divisions to support 3 nesting pairs. The next box is proposed to be installed below the eaves on the right elevation of the Outbuilding facing the adjacent field. This location will provide a quiet, undisturbed and protected access and egress to the nest box.

Provides three separate nest boxes in one FSC ® certified timber terrace, each with its own 32mm entrance hole. Beautifully made in the UK.

RSPB nest boxes provide a safe and snug place for birds to roost and nest. Unlike cheaper alternatives, our [bird houses](#) are made from sustainable FSC certified timber and have excellent insulation properties. This makes them warm in winter and cool in summer. RSPB nest boxes are carefully designed with correct dimensions and ventilation, without perches for intruders to grip onto and threaten the occupants.
