Dear Sir,

Re: Amendment to planning permission Ref: P2020/0354 to allow for the installation of a carport with associated PV panelling.

Please find attached a planning application to provide an additional carport with associated PV which will sit above the recently approved EV charging bays.

The carport will showcase Oxford PV which is a pioneer and technology leader in the field of perovskite solar cells.

The company was established in 2010, as a spin-out from the University of Oxford. The panels are low cost, highly efficient photovoltaic technology which can integrate with standard silicon solar cells to dramatically improve their performance. These new solar cells deliver more power per square meter than traditional cells and will enable Swansea University to assess the performance against the standard market panels which will be located on the main Y Twyni Building.

Should you require anything else, please do not hesitate to contact me.

Yours faithfully

Tom Gronow
Project Officer
