Dear Sir,

Re: Replacement of basketball & volleyball courts with MUGA and associated floodlighting.

The Higher Education Funding Council Wales (HCFW) has awarded Swansea University significant funding to improve sports facilities at Bay Campus, Swansea University. The proposal seeks consent to replace the existing half basketball and volleyball court with a full size MUGA and associated lighting which will primarily be used for basketball.

The new MUGA would sit adjacent to the existing MUGA's and will replace the existing hardstandings with a new modern all weather facility. The MUGA will incorporate low level lighting which reflects the existing lighting on the adjacent MUGAs. A 3m fence would be erected around the facility and a higher net on the southern side to stop balls being lost to the sea.

A storage container is also proposed as part of the scheme to store equipment associated with the MUGAs which will be sunk into a revised landscaping scheme which will utilise the ground material associated with the construction on site.

Should you require anything else, please do not hesitate to contact me.

Yours faithfully

Tom Gronow
Project Officer
