Dear Sir,

Re: Gym Annexe, Bay Campus, Swansea University.

The Higher Education Funding Council Wales (HCFW) has awarded Swansea University significant funding to improve sports facilities at Bay Campus, Swansea University. The proposal seeks consent to the existing gym at Bay Campus in order to provide additional indoor sports facilities for the growing student numbers.

The extension would sit adjacent to the existing gym and extend out into the adjacent courtyard area.

The extension will incorporate contemporary materials including anthracite grey windows and door with metal cladding walls to match the existing building. The scheme will incorporate a glazed link between the buildings and utilise a green roof in order to improve biodiversity and address SAB Drainage Requirements. The proposal will also incorporate solar PV panels to help try and generate some of its own energy requirements.

The extension will be shielded from wider vantage points as it will be contained within the existing courtyard. The additional facility will help address the need for extra student facilities on Bay Campus and help improve student experience and attract students to Swansea.

Should you require anything else, please do not hesitate to contact me.

Yours faithfully

Tom Gronow
Project Officer
