

Biodiversity Enhancements to 10 Graig Road, Trebanos, Swansea. SA8 4BA.

Planning Application No. P2021/0158

Dear Mr Stark

It is our intention to include an organic vegetable garden, a pond which will attract a variety of wildlife as well as providing a habitat for all pond creatures; an area for wildflowers to grow, bird feeders and bat boxes. We are strong believers in not using pesticides and herbicides and are also keen to persuade our new neighbours to follow suit as we very much hope to keep bees. We also plan on composting, using our own kitchen waste when possible, harvesting rainwater for garden use thus reducing tap water waste, and including as many bird boxes as possible.

We have over 30 years of gardening experience and are keen to re-establish as many native plants as possible as well as bee-friendly plants and flowers for the benefit of all pollinators.

Tudur and Sara Jones.
