Thrutone Smooth

Cedral Thrutone Smooth are a low-profile fibre cement slate that features a smooth surface and square cut edges for a sleek, aesthetically pleasing finish. They are particularly suitable to complex roof geometries. They are one of the strongest slates on the market and are popular with architects and roofers.

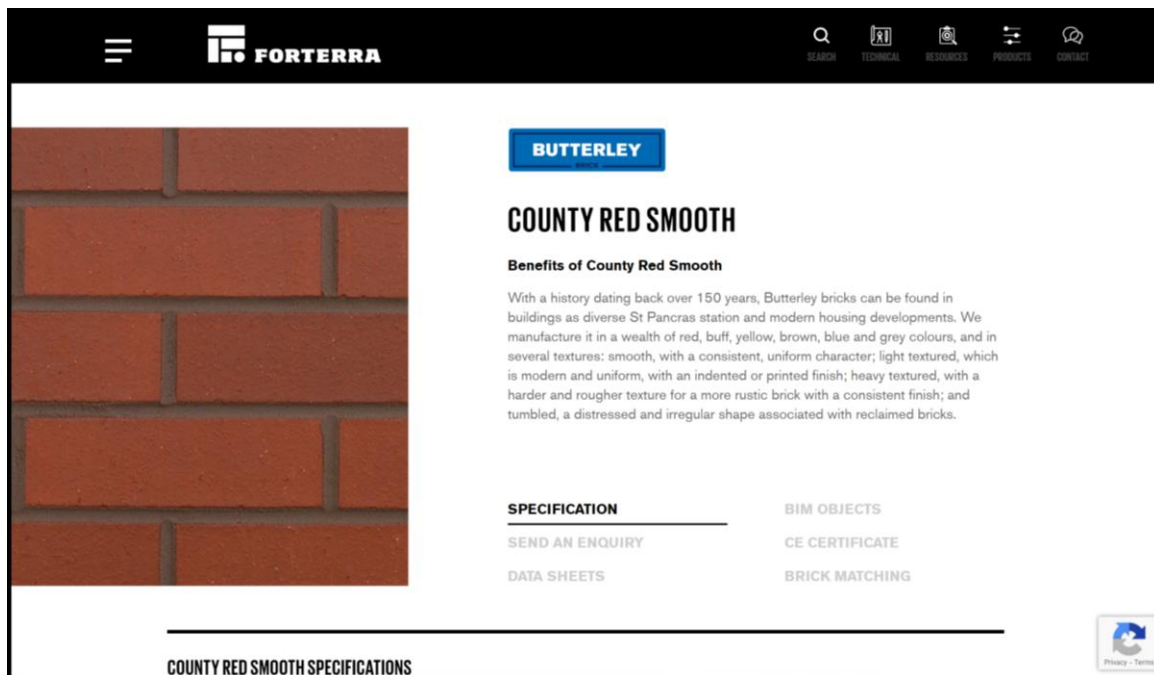

With more cement and fibres than any other, Cedral slates are the strongest slates in the market, tough enough to withstand the most volatile weather conditions.

Available in six colours and three shapes, Thrutone slates provide complete design flexibility. With its low wastage and ease of installation, it's easy to see why it is the slate of choice for all types of new build and refurbishment projects.

Used on a variety of applications, Thrutone slates provide the flexibility to create inspirational roofs and facades.

COUNTY RED SMOOTH

BUTTERLEY

Benefits of County Red Smooth

With a history dating back over 150 years, Butterley bricks can be found in buildings as diverse as St Pancras station and modern housing developments. We manufacture it in a wealth of red, buff, yellow, brown, blue and grey colours, and in several textures: smooth, with a consistent, uniform character; light textured, which is modern and uniform, with an indented or printed finish; heavy textured, with a harder and rougher texture for a more rustic brick with a consistent finish; and tumbled, a distressed and irregular shape associated with reclaimed bricks.
