NC 33/1000 – NC 33/1000W Single Skin Cladding

National cladding offers premium grade metal products that are backed by industry-leading warranties for both painted and plastic coated systems. Our metal roofing and wall panels are durable, economical, energy-efficient and offers a long life expectancy, in addition to a long service life.

Metal is widely known as a resilient material and a strong match for extreme weather conditions. Supported by third party testing NC/1000 roof and wall panels offer fire and wind resistance and prevent air and water leakage capable of withstanding high winds. The profile panels are strong contributors to durable, weather-tight building envelopes.
