

Figure:	A3.5 - Viewpoint Map, VP5
Viewpoint 5:	St Iltyd's Walk at Edge of Forest, Looking North East
OS Reference:	283529E 200114N
Direction of View (degrees):	80
Distance to Nearest Turbine:	1,003 m
Number of Blade Tips Theoretically Visible:	5
Number of Hubs Theoretically Visible:	5
Date and Time of Photography:	09/10/2013 at 09:36

Information on Limitations of Visualisations:

Visualisations of wind farms have a number of limitations which you should be aware of when using them to form a judgement on a wind farm proposal. These include:

- A visualisation can never show exactly what the wind farm will look like in reality due to factors such as: different lighting, weather and seasonal conditions which vary through time and the resolution of the image;
- The images provided give a reasonable impression of the scale of the turbines and the distances to the turbines, but can never be 100% accurate;
- A static image cannot convey turbine movement, or flicker or reflection from the sun on the turbine blades as they move;
- The viewpoints illustrated are representative of views in the area, but cannot represent visibility at all locations;
- To form the best impression of the impacts of the wind farm proposals these images are best viewed at the viewpoint location shown;
- The images must be printed at the right size to be viewed properly (260mm by 820mm);
- You should hold the images flat at a comfortable arm's length. If viewing these images on a wall or board at an exhibition, you should stand at arm's length from the image presented.
- The ZTV presented here takes no account of the screening effect of vegetation or buildings.

Additional Notes:

Notes:

1. This figure has been based on the following parameters:
 - Rotor diameter: 133m • Height to blade tip: 149.9m
2. Direction given as bearing relative to Grid North (BNG).
3. The number of turbine blades and hubs theoretically visible assumes bare earth scenario, vegetation screening not accounted for.

Zone of Theoretical Visibility:

- 1 Turbine
- 2 Turbines
- 3 Turbines
- 4 Turbines
- 5 Turbines
