

Legend

Proposed Mine Waste Repository and Nant-Y-Mynydd Conservation Area Planning Application Boundary

Peat Thickness on Undisturbed Areas

November 2010 Survey

0 - 0.75m

0.75 - 1.50m

1.50 - 2.25m

2.25 - 3.00m

>3m

Peat Thickness on Undisturbed Areas

November 2013 Survey

0 to 0.15m

0.15m to 0.6m

0.6m to 1.2m

1.2m to 1.8m

Greater than 1.8m

Peat Thickness on Previously Worked Areas

0 - 0.75m

0.75 - 1.50m

1.50 - 2.25m

2.25 - 3.00m

Visible Exposure

Probe

Mine Waste Repository Boundaries

Approved boundary

Proposed redesign

Note:
Approximately 50,000m³ of Peat was excavated in the course of operating the Forest Quarry 2 Extension OCCS and deposited within 3 purposely constructed cells within the conservation areas on Nant-Y-Mynydd for the creation of new peat bogs as part of a comprehensive mitigation scheme.
