Lighting column
positions.
- Depicted in
yellow on slide.

Details of the proposed tennis court flood lighting system.

- Light description – PHILLIPS BVP518 1480/757 A55-NB DGR S LED Flood lights.
- Number of LED lighting units = 16.
- Number of LED lighting units per court –
 - - Two on court 1.
 - - Six on court 2 (2 for court 1 and 4 for court 2).
 - - Two on court 3.
 - - Six on court 4 (2 for court 3 and 4 for court 4).
- Lights to be controlled by an automatic timer from the LTA gate control panel (12v output to a relay to switch the lighting).
- Lighting will not be used after 8pm (a request would be made IF there was a special occasion should lighting be required after this time).
- Steel Wired Armour cable to be discreetly run between units along the top edge of the court boundary fencing.
- Number of LED lighting support columns = 12.
- All columns to be 8m in height.
- All columns are manufactured from steel.
- All columns will be ? in colour.
- All columns will have a ? finish.
- All columns will be flange mounted at the base.
- All columns to be positioned within the court boundary (tight into the corners as possible).
- All columns to be secured in the ground with concrete aggregate (drawing provided).
- On completion there will be protective fencing installed in front of all the lighting columns.
