

10k Raster Mapping

Published 2006

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster map data. These maps are updated from the data which was used in 1:10,000 maps. The data is highly detailed showing buildings, roads and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

VectorMap Local

Published 2016

Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced from OS's VectorMap Local, a vector dataset that has been designed for use at a scale of 1:10,000. OS VectorMap Local has been designed for use at a scale of 1:10,000. OS VectorMap Local is derived from large-scale information surveyed at 1:2500 scale (covering major towns and cities), 1:2500 scale (smaller towns, villages and developed rural areas), and 1:10,000 scale (mountain, moorland and river estuary areas).

Caerau Parc

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1940s. 1854 is the earliest date shown, and the maps were surveyed between 1854 and 1864. The maps were surveyed at a scale of 1:2,500 and were considered to be the most accurate maps of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a 'work-in-progress' plan as they showed updates of individual areas as they came in. These maps were unpublished and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

Caerau Parc

Landmark
 800 541 4673 or 416 291 4673

Glamorganshire

Published 1877

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at a 1:2,500 scale for England, Wales and Scotland in the 1840s, 1854 and 1861. The maps were reproduced at a scale of 1:2,500 and the scale of the original maps was considered to be the indicated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Caerau Parc

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1940s. In 1854 the Ordnance Survey was created by an Act of Parliament and was responsible for the whole of what were considered to be the inhabited parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Ordnance Survey Plan

Published 1950 - 1951

Source map scale - 1:1,250

The historical maps shown were reproduced from maps predominantly held at a scale adopted for England, Wales and Scotland in the 1840s. 1854 the 1:2,500 scale was adopted for Ireland. The maps were produced by the Ordnance Survey, which was responsible for the mapping of Great Britain. The published date given below is often many years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Ordinance Survey Plan

Published 1962

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at a scale adopted for England, Wales and Scotland in the 1940s. 1864 the scale was changed to 1:2,500 and the maps were reissued. The maps covered the whole of what were considered to be the delineated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Additional SIMs

Published 1968 - 1978

Source map scale - 1:1,250

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are further minor editions of mapping which were produced and published in between the main editions of the Ordnance Survey maps from 1947 to 1994, and contain detailed information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

Large-Scale National Grid Data

Published 1993

Source map scale - 1:1,250

Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's Survey of Information on Microfilm) in 1992, and continued to be produced until 1999. These maps were produced by digitising original maps and provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Glamorganshire

Published 1877

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at a 1:2,500 scale in England, Wales and Scotland in the 1940s. In 1854 the Ordnance Survey was created and the first 1:2,500 scale map was published. The whole of what is now considered to be the delineated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Large-Scale National Grid Data

Published 1993

Source map scale - 1:2,500

Large Scale National Grid Data superseded SIM cards (Ordnance Survey's Simulation on Microfilm) in 1992, and continued to be produced until 1999. These maps are not intended for digital mapping and do not provide detailed information on houses and roads, but tend to show topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Ordnance Survey Map

Published 1962

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at a 1:2,500 scale for England, Wales and Scotland in the 1940s. In 1854 the Ordnance Survey adopted the Cassini projection for its maps. The scale of the maps was reduced to 1:2,500 in 1962. The maps were then reprojected to the current datum, the datum of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.
