

Published 1900 Source map scale

The historical maps shown were reissued at the scale adopted for England, Wales and Northern Ireland. The 1:2,500 scale was adopted for rural areas, the 1:10,560 scale was adopted for urban areas. The 1:10,560 scale was often some years later than the source maps. The source maps were based on the Cassini Project maps of counties or groups of counties, giving areas. In the late 1940's, a Provisional Revision of the 1:10,560 mapping from a number of sources was produced - with all military camps and towns. The 1:10,560 maps were initially overprinted with the 1:10,000 maps. The revision process continued until revision was complete. It took 10 years or so for urban areas.

Source map scale

The Historical Aerial Photos were produced at a scale of 1:1,250 and 1:10,560 from original aerial photographs produced between 1944 and 1951 for the preparation of conventional mapping. New security measures in the 1950s meant that the original editions were checked for potentially unsafe information, such as fields or clouds. The original editions were made available after a period of fifty years. The original editions, without editing, without viewing both revisions, and without viewing both revisions, are available.
