Dear Sir

RE. ABERPERGWM COLLIERY PLANNING PERMISSION P/2014/0729, CONDITION 32, IMPROVEMENTS TO THE SURFACE WATER AND MINE WATER DRAINAGE REGIME.

Please find enclosed an application for the variation of a condition included within the Planning Consent, ref: P2014/0729, dated 27th September 2018. The condition in question is Condition 32, and specifically, Figure 9.2 referred to in that condition, which relates to the Existing Yard Surface Water Drainage Layout. Copies of the consented Figure 9.2 and the proposed revised plan, referred to as Figure 9.2 Existing Yard Surface Water Drainage – Rev A are enclosed. This application will replace the variation application previously submitted on the 10th October 2019.

The condition and plans relate to the extension of the existing concreted surface area and the installation of a new drainage channel as indicated on Figure 9.2 – Existing Yard Surface Water Drainage Layout Rev A. The works detailed in the remainder of Condition 32 have been completed.

It is proposed that the works be undertaken in a phased manner with those required to the Phase 1 area (hatched black on the Revised plan) being carried out as soon as is reasonably practicable. Phase 2 works (hatched green) will then be carried out in due course thereafter.

Payment of the £230 in respect of the application fee will be arranged via the online Planning Portal website.

Please do not hesitate to contact me if I can be of any further assistance.

Yours Sincerely

Ruby Davies
