15	Statement of Ecological Enhancement	RB Planning & Dev

The application site is within settlement limits and therefore the principle of development is generally accepted. There appears to be no ecological or highways issues and no issues in respect of residential amenity.

The application is for one dwelling within a site the subject of an application for eight dwellings planning reference number P2022/0557

Plans for plot 5 are in an advanced state and will be submitted within the next two weeks this will take the site to a total of 10 dwellings.

The applicant is not seeking to “*threshold dodge*” and avoid section 106 obligations nor is he is seeking to avoid the nominal additional cost of going through the PAC process by developing the site in two or more phases.

Where financial viability permits the applicant is prepared to pay section 106 obligations based on the final developed number of 10 dwellings.

Yours faithfully,

Robert Bowen.
