CONSTRUCTION

Works to be carried out 28, 29 and 30th of December

Strip off party wall in grooming area

Build new stud wall to take 100mm acoustic insulation batts (Rockwool sound insulation slab)
Achieves part E, resistance to sound.

One layer of membrane (1200ga DPM) to be fixed to stud wall

One layer of 9mm OSB board to allow for fixings anywhere on the wall

Two layers of 15mm acoustic plasterboard to be attached on top (Knauf 15mm soundshield plus)

12mm acoustic plasterboards to be attached over existing ceiling (Knauf 12mm soundshield plus)

All new plasterboard areas to be plastered to a high standard

All waste to be removed from site

Knauf soundshield plus application: For use as cladding component in partition and lining systems, offers enhanced acoustic performance, excellent fire resistance and severe duty rating for use where sound reduction is of particular importance.

Compliance:12mm EN520, Types A and D, 15mm EN520, Types A, D, F and I

Materials - £1,280.00

Labour - £1,200.00

Waste removal- £200

TOTAL - £2,680.00
