

Pollution control statement

The proposal is for splitting the existing A1 unit (barber shop) into two units. A change of use is required for an A3 unit to be created.

The A3 unit is expected to be a chicken franchise (favourite chicken) and will mainly be frying of chicken, chips and other foods.

The below are details of the proposed extraction system:

1. Flue to be 1m above eaves
2. Use baffle grease filter for odour control
3. SLC fan – Elta SLC450/”A-3AC long cased axial
4. High velocity jet cowl
5. Inlet silencer with anti-vibration pads
6. Fan/motor to be internally mounted

Details of silencer and fan are attached as supporting documents with this application.
