Biodiversity enhancement measures

1 no. external bird nesting box will be attached to the north east facing elevation of the adjacent cricket score box. The bird box will be positioned to face north east in order to avoid strong sunlight and the wettest wind.
The bird box will be of a size and design suitable for use by House Sparrow. It will be sited within three months of the date of planning permission being granted

House Sparrow box was chosen for biodiversity enhancement since in parts of the UK, numbers in towns and cities have declined by 60 per cent. Because of these large population declines, the house sparrow is now red-listed as a species of high conservation concern. Please see below details of where the bird box will be located:
