Kilimanjaro

This Kilimanjaro climber encourages children at the playground to get active and enjoy the fresh air. It features natural look and ecological materials like robinia and larch wood. Climbing net is made of easy-to -handle, resistant to acid, alkali, sunlight and rain reinforced rope made of natural fibres and galvanised steel handle and two curl shaped climbing poles.

All elements show off natural colours and natural original shapes. Children can climb on the wooden board or climbing net to reach the top of the Kilimanjaro. As children play, they develop core body strength, as well as coordination skills and hand-eye coordination. This piece of playground equipment is suitable for children from 3 years old.

Kilimanjaro climber from Lars Laj can be used in conjunction with other Nature playground equipment to give children a fun play area with lots of activities to enjoy.

- Width
229 cm
- Length
approx. 306 cm
- Height
210 cm
- Critical falling height

Birds nest

This bird nest robinia swing is a great option for every child. The special round seat allows comfortable and cheerful rocking. Children can either swing at a high speed or slowly in order to relax after a busy day. Thanks to the size of the bird nest seat, several children can swing together at the same time. That's why this swing is perfect for playgrounds designed to be used by many kids at once, for instance in the nurseries, day-care facilities, parks, schools and others.

DIMENSIONS

- The swing's length and width are 95 cm x 250 cm.
- The total height is 159 cm.
- The critical fall height for this unit is 100 cm.
- The safety zone for this swing measures 220 cm x 600 cm.
- It is required to install the proper safety surface under this play equipment, such as wetpour, shock absorbing pad with artificial grass, rubber tiles or the natural surface like sand.

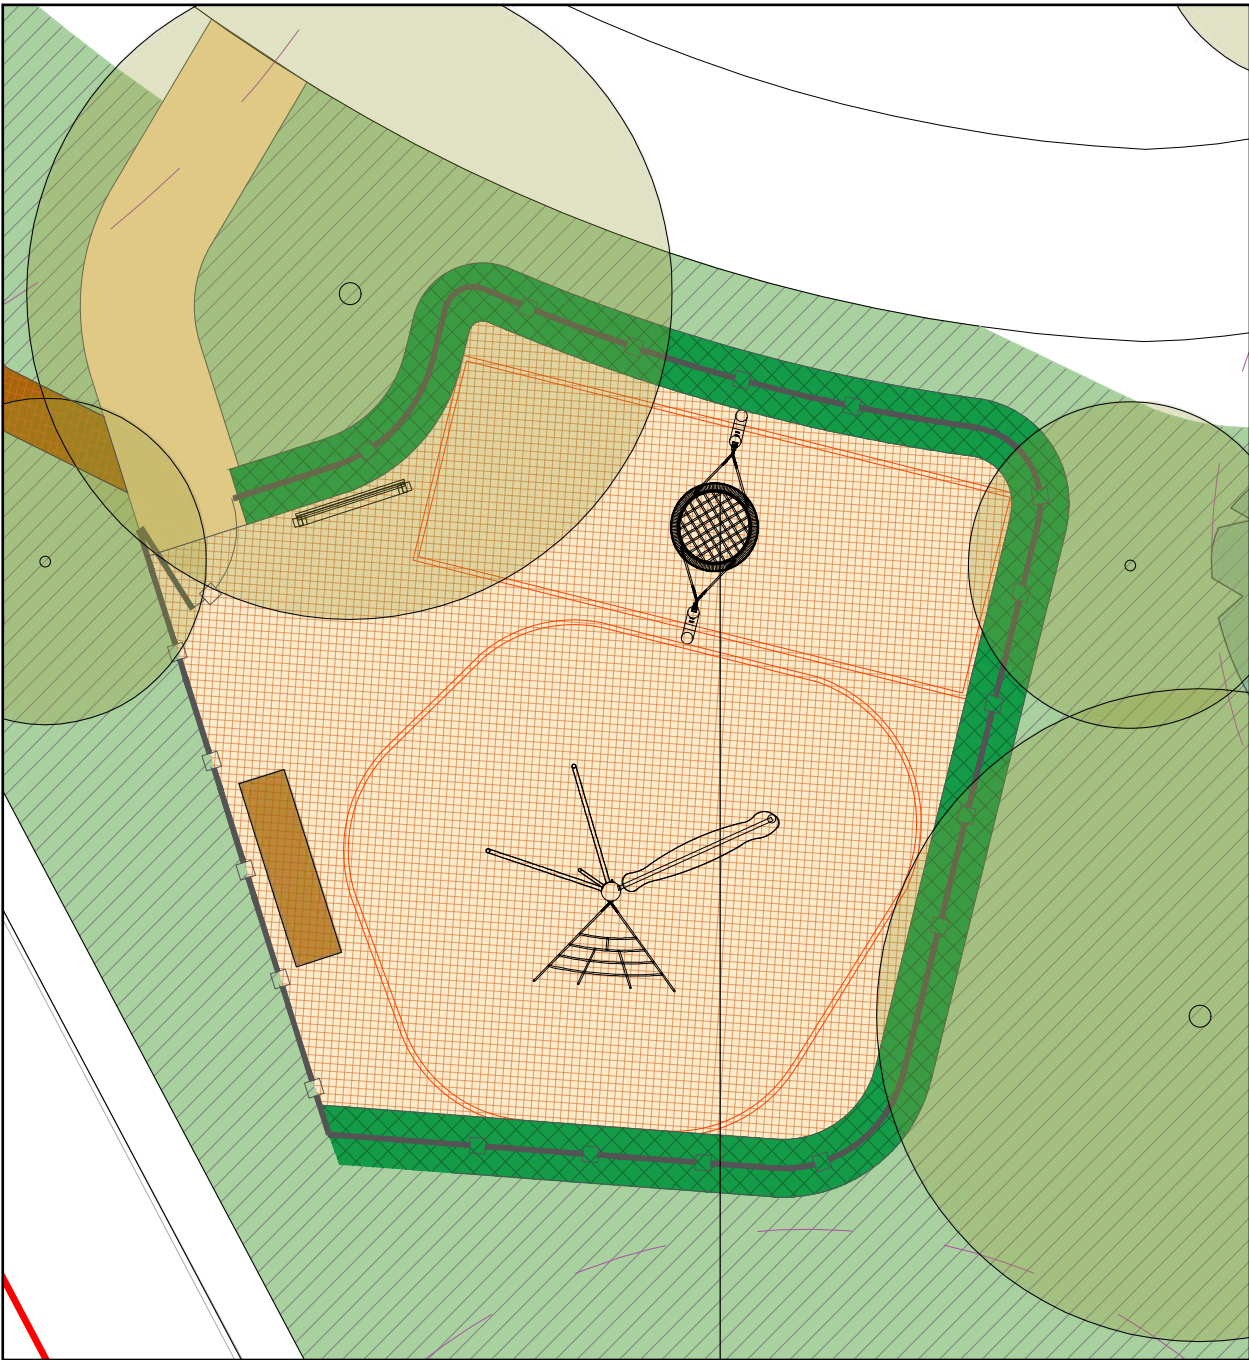

MATERIALS

- The bird nest swing seat is hung on two posts installed at a slanted angle.
- The swing posts are made of durable robinia wood.
- The bird nest swing seat is handcrafted and made of strong polypropylene braided ropes.
- The seat is available in two colours: black and beige.
- Chains and shackles are stainless steel.

Robinia wood is a natural material which fits nicely in the green surrounding of the park, private garden, as well as any green urban space. Lars Laj offers various types of robinia swings, such as bird nest swings, flexi seat swings, flat seat swings and others.

SAFETY

Children who are at least 3 years old can safely play on a wooden swing set like this. The whole construction, installed on 2 durable robinia posts, is stable and manufactured from the high quality materials. Lars Laj's factory is ISO 9001:2015 and 14001:2015 certified.
