Hi Mathew

Sorry for the delays, we have had this email off Barry cox last week and as you will see they have asked us to send you the measurements for the cafe being risen off the ground

Please find below

As you are aware the cafe sits at a minimum 450mm off the ground and at some points it sits 5-600mm off the ground.

These are the measurements that we were asked to send to you could you please advise further.

Thank you

Darren Hughes

Good Afternoon Emma,

In light that NRW are not able to provide this information, if you submit the level your café is located above the ground level to the Local Planning Authority. I will provide a response to the council when consulted stating the potential depth of flooding in relation to the finished floor levels of your cafe.

Kind Regards

Barry
