COMMERCIAL KITCHEN CANOPY

DESCRIPTION

VIDEOS

ÿ

The Compact Recirculation Low Extract Duty system removes contaminated grease laden air and cooking odours from the cooking process.

ÿ

The unit allows the grease to be filtered effectively before introducing the air back into the kitchen area.

ÿ

1st Stage ? Stainless steel grease filter

2nd Stage ? Plenum chamber

3rd Stage ? Coarse washable filter media

4th Stage ? F5 filter media

5th Stage ? Carbon media

With regular maintenance and a strict cleaning schedule the system will effectively remove odours.

We recommend that the grease filter should be cleaned on a daily basis, to keep things working optimally.

Plenum chamber and wash ablefilter media to be cleaned daily.

F5 filter and carbon media to be change 2 -3 times a year (depending on usage)

ÿ

?

Help

Each unit is capable of dealing with an air volume of 800m³/hour @ 300Pa

ÿ

The unit can be configured to operate in a variety of configurations.

- Top extraction

Please note: You will require 1 unit per filter, canopy soldÿ
separately
