Description

The Insect Hotel is designed to attract and provide shelter for a wide range of insects.

The different floors of this insect shelter for a variety of insect species. The tubes at the top are designed for solitary bees, such as Red Mason Bees, to lay their eggs. There is also a floor with vertical slots to encourage butterflies, a section that has openings for ladybirds and lacewings.

Specifications:

Width (cm)	Length (cm)	Height (m)
79	27	1.29

Supporting Biodiversity

We recommend using these insect hotels in conjunction with [Insect & Bird attracting Wildflowers](#). You can purchase in confidence knowing that each wildflower seeds mixture in our range will produce a vast array of colourful wildflowers to attract insects, and a large amount of seeds to attract birds.

For further information on the Corsica Insect Hotel, please contact a member of our technical sales team on **01952 897917**.
