Identification of Tree(s) and Description of Works

Before answering these questions you might find it helpful to consult a tree surgeon to clarify what needs to be done.

Please provide a full and clear description of:

- The proposed works
- The trees affected including species and location

3x T1-T3 Oak tree to reduce overhanging branches by approx 2.5m
1x G1 - Group of sycamore to reduce overhanging branches by approx 2m

Trees protected by Tree Preservation Order should be numbered according to the First Schedule of the Tree Preservation Order. For example - T3 oak; two beech and one birch in G2.

You must identify the trees on a sketch plan showing the location in relation to building(s), named roads and boundaries.

Please state the reference you have given the plan (as described above)

TPO Map SA11 3FH

Your plan needs to show the precise location of the tree(s) in relation to nearby property/roads/boundaries. It should, therefore:

- indicate the main features of the site where the tree(s) stand and its surroundings; in particular, you should:
 - mark and name surrounding roads
 - sketch in buildings, including adjoining properties
 - add house numbers or names
- mark the position of the tree(s) to which you want to carry out work
- identify them by the number shown in the Tree Preservation Order where possible; if you use a different number, please make sure that this can be matched with your description of the tree(s)
- if there are many trees on the site, make clear which tree(s) are included in this application by:
 - marking all trees on the plan, but only numbering those to which you want to carry out work
 - showing the approximate distance between the application tree(s) and buildings
 - adding other relevant features on the site (e.g. greenhouse, paths)

If it is impossible to identify the tree(s) accurately on the plan (e.g. because they are part of a woodland or group of trees), please identify their approximate location on the plan and provide details of how the tree(s) are marked on site (e.g. high visibility tape, tree tags, paint, etc); trees must not be marked by scarring or cutting into the bark.

Trees - Reason(s) for work(s)

Please state the reasons for carrying out the proposed works on the tree(s)

Overhanging branches are causing a concern for the home owner as there is a large amount of branches over the garage, driveway and garden of the property. These branches regularly drop dead branches, leaves which cause blockages and flooding and create a mess on the patio, along with the seeds from these trees - acorns and sycamore pods.

This work has been carried out previously and the homeowner wants the work carried out again to provide sufficient clearance over the property and improve lighting within the house as this is now in deep shade for most of the day.

Do your reasons for carrying out the proposed works include any of the following

Health or safety of the tree(s) - e.g. it is diseased, fears that it might break or fall

- ☐ Yes
☒ No

Alleged subsidence damage

- ☐ Yes
☒ No

Trees - Additional Information

Are you providing additional information in support of your application?

- ☒ Yes
☐ No

If Yes, please provide the reference numbers of plans, documents, professional reports, etc in support of your application
