TREE REPORT in relation to: REF P2023/0404,
Ian Cole,
10, Cromwell Avenue,
Neath SA10 8DW.

Having viewed and inspected the mentioned Chestnut, the tree appears to be in good health both at base and all over canopy wise.

We and our client are presently applying for permission to prune/remove growth that is now overhanging the garden area. This requested work is identical to work we've carried out twice in previous years on this particular Chestnut. The works will be confined to the removal of regrowth since the last time it was pruned, which will not involve the uppermost canopy, this will remain in its natural state in the interests of the tree's health and longer term appearance.

We trust this report and application are in order and look forward to hearing from you,
yours faithfully,

John Blake.
