Hi Matthew,

Further to your email below, please find attached a Traffic Management Plan for consideration which sets out the proposed measures for the safe operation of the facility.

As has been mentioned in previous email exchanges, the facility has been operating for the some time now without any highway or pedestrian safety issues within the site. Attached for information is a copy of a redacted invoice dating back to March 2022.

Customers are not permitted to store any flammable materials such as petrol, propane gas, solvent based paints, solvent base glue etc in the units for health and safety reasons and this is written into the contractual agreement with the customer.

We are trying to close off this highway matter first before instructing JBA to amend the FCA to address the comments by NRW. We are confident that the flooding points can be addressed. Based upon the above, and on the basis of your previous email that confirms that the matters do not relate to general highway safety matters, could you please confirm via return email that such matters have been satisfactorily addressed.

Many thanks

Regards

Rob Davies - Associate
