

In pursuant of condition 4

Addendum to Method Statement

1. Display the name and contact details of person(s) accountable for air quality and dust issues on the site boundary. This may be the environment manager/engineer or the site manager.
2. Display the head or regional office contact information
3. Record all dust and air quality complaints, identify cause(s), take appropriate measures to reduce emissions in a timely manner, and record the measures taken.
4. Make the complaints log available to the local authority when asked.
5. Record any exceptional incidents that cause dust and/or air emissions, either on or off-site, and the action taken to resolve the situation in the log book. Undertake daily on-site and off-site inspection, where receptors (including roads) are nearby, to monitor dust, record inspection results, and make the log available to the local authority when asked. This should include regular dust soiling checks of surfaces such as street furniture, cars and window sills within 100m of site boundary, with cleaning to be provided if necessary.
6. Carry out regular site inspections to monitor compliance with the DMP, record inspection results, and make an inspection log available to the local authority when asked
7. Ensure all vehicles switch off engines when stationary – no idling vehicles.
8. Ensure an adequate water supply on the site for effective dust/particulate matter suppression/mitigation, using non-potable water where possible and appropriate.
9. Use water-assisted dust sweeper(s) on the access and local roads, to remove, as necessary, any material tracked out of the site.
10. Avoid dry sweeping of large areas
11. Ensure vehicles entering and leaving sites are covered to prevent escape of materials during transport.
