

FRONT ELEVATION - OPTION 1
1 : 100

The drawing is a detailed architectural elevation of a building's front facade. It features a long, single-story structure with a brick or masonry finish. The facade is punctuated by a series of windows of varying sizes, some with dark frames and others with lighter, possibly glazed, sections. A prominent red line runs horizontally across the upper portion of the facade, likely representing a roofline or a specific architectural element. A red line labeled 'A' is positioned on the left side, indicating a specific section or detail. On the roof, a red line points to a 'Gated access to roof' area. To the right of the main building, there is a small, arched structure that appears to be a gate or an entrance. The background includes faint, stylized outlines of trees and a large, arched structure, possibly a tunnel or a bridge, suggesting the building's context within a larger environment. The drawing is labeled 'FRONT ELEVATION - OPTION 1' and '1 : 100', indicating it is a scaled representation of the building's front view.

1 : 100

Architectural elevation drawing of a building facade. The drawing includes mechanical callouts for a cafe extract system. A red line connects the text "Cafe extract - compliant with DW /172" to a red dot labeled "B" on the roof. Another red line connects a red dot labeled "A" on the roof to a red dot labeled "A" on the ground level. The building features a brick facade, a central entrance with a red awning, and a staircase. The drawing is set against a background of stylized trees and a scale of 1:100.
