Sandfields Primary

The proposed building would be located within the existing yard area, would sufficient playground remain on site? I am of the understanding that there is a area calculation of playground space to children numbers required within schools. While this may not be a planning matter it could impact the school requirements.

Would the building be a classroom or more of a hall space?

The proposed window details appear to extend out over the footpath, and as the footpath is relatively narrow it is advised that the building is either set back into the site or the overhang from the windows is reduced.

I note that no parking is proposed within this proposal, with the site also having a separate pedestrian access off the footpath. Opening hours would be required should a planning application be submitted.

The application site is located within a C1 flood zone and within the new Flood Maps for Planning Zone 3 – as such a Flood Consequence Assessment would be required if a planning application was submitted.

The application would require the submission of a Green Infrastructure Statement and biodiversity enhancement, as requested by chapter 6 of PPW12.
