

DESIGN and ACCESS

Margam Castle Alarm System, Upgrading /Essential Works

November 2024

Design and Access

These proposals for upgrading Alarms at Margam Castle will not impact existing arrangements for accessibility.

However, areas of the Castle will need to be closed off during the contract period and that could impact on the horizontal flow of pedestrian traffic at the ground floor level. Scheduling of a rolling programme for closures is not known at this time, but to be addressed in the development of Contractors Method Statements. (Refer to Heritage Impact Assessment).
