

Traditional equipment (technical specification)

J490

- 1- The posts and the horizontal beam** (diameter 120 to 140mm), are made from sap free robinia.
The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

- 2- The swing bearings** are made of stainless steel.

- 3- The swing seats** are made of shock absorbing moulded honeycomb rubber.
The swing chains are made of stainless steel.
The seat fixing brackets are made of 10mm stainless steel wire.
PVC sliding rings are fitted to limit the wear of the metal parts over time. The rings are accessed by a vandal proof, stainless steel shackle.

- 4- The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
