

Additional Statement - Aberavon Harlequins RFC

As part of our installation we will achieve lux levels no greater than those set out on plan SP-DWG 10 Rev 0, and to be operated as such thereafter. Prior to their first operational use, the lighting levels shall be tested and lighting adjusted to ensure compliance with these details. The results of the testing shall be submitted to and approved in writing by the Local Planning Authority prior to their first operational use. If levels exceed those specified, mitigation measures shall be implemented, and the lighting re-tested until reaching compliance.

Following the implementation of the lighting scheme, on receipt of any substantiated complaint regarding the lighting scheme, the rugby club shall be responsible for the carrying out of an investigation into the complaint within one month of the complaint and identify any required mitigation measures to alleviate any adverse impacts associated with the lighting. A written copy of the investigation and its findings together with any required mitigation shall be submitted to and approved in writing by the Local Planning Authority. The approved mitigation scheme shall be fully implemented on site within one month of the approval of the submitted details and shall be retained as such thereafter.

Kind regards,
Macauley
