About this product

weberend one coat dash is a pebble dash receiver which allows for applying decorative aggregates after a single coat, and is suitable for machine or hand application.

- Apply and finish on the same day saving 3-7 days typically associated with a traditional multi-coat pebble dashing system
- Available in a range of 5 render colours with 21 options for decorative aggregates
- Can be applied onto most types of brick and blockwork
- Applied to a thickness of approximately 16mm for moderate exposure areas, or approx. 20mm for severe exposure

This innovative render allows for faster application, reducing programme periods and associated scaffolding and site costs.
