Tree Constraints Plan

Site - Pen Caer Lan Farm

Project Ref - 1731.1

Scale 1:2000 @ A1

KEY BS 5837:2012 Tree Quality (Colour Coded) - Individual Trees

Category A (High)
("Highly desirable for retention")

Category B (Moderate)
("Desirable for retention")

Category C (Low)
("Optional for retention")

Category U (Poor)
("Unsuitable for retention")

Tree Key - Individual Trees

Root Protection Area (RPA) *(A layout design tool indicating the minimum area around a tree deemed to contain sufficient roots and rooting volume to maintain the trees stability and health, provided that the roots and soil structure is treated as a priority.)*

Tree Key - Group/Area/Woodland/Hedgerow

Shade Pattern - shade pattern not shown on plan (Early morning shade starting North West through to evening shade North East)

Definitions of BS5837:2012 Categories for Trees, Woodlands and Hedgerows (Colour Coded).

A - Those of high quality with an estimated remaining life expectancy of at least 40 years. ("Highly desirable for retention")

B - Those of moderate quality with an estimated remaining life expectancy of at least 20 years. ("Desirable for retention")

C - Those of low quality with an estimated remaining life expectancy of at least 10 years, or young trees with a stem diameter below 15 cm.
("Optional for retention")

U - Those in such a condition that they cannot realistically be retained as living trees in the context of the current land use for longer than 10 years.
("Unsuitable for retention unless provides high conservation value")

Please Note:
Barriers and Ground Protection must be designed by an arboriculturist, installed before materials or machinery is bought onto site and before any demolition, development or stripping of soil commences. Once erected, barriers and ground protection should be regarded as sacrosanct, and should not be removed or altered without prior recommendation by an Arboriculturist and approval of the Local Planning Authority (LPA).
