Hi Chris

I have attached the following documentation to support the demolition process:

1. JMS for the task.
2. Asbestos report.
3. The electrical decommission certificate.
4. The metal recovery plant plan.
5. A overview document of the metal recovery plant.

Further to this and the below email, see below details:

1. The hours of work will be Monday to Friday 7am to 5pm.
2. Dust suppression unit will be brought to the task and utilised when required, this will be moved to each component of the plant as it is removed.
3. Other environmental controls are that we have an on-site workshop which will support any breakdowns and servicing of the plant equipment, our workshop is approx. 150 metres from the metal recovery plant and is a very large building which the mobile plant will be worked on indoors.
4. We also will have a hot work permit in place with various fire extinguishers in the area.
5. Last one, we have mobile oil spill kits in our workshop if required whilst the task is ongoing.

Hope this is all good for yourselves.

Kind Regards

Mark Tilling
