Land based activity

Essential criteria

Food produced and purchased		
Food category	Food produced (£ Monetary value)	Food purchased (£)
Meat	£	£
Poultry meat and products	£	£
Fish	£	£
Fruit and vegetables	£	£
Cooking oil	£	£
Dairy	£	£
Grain mill products	£	£
Bread / rice / pasta / cereals	£	£
Cocoa, Chocolate etc.	£	£
Non alcoholic beverages	£	£
Other	£	£
Total	£	£

Percentage of food produced / purchased	
Produce	%
Purchased	%

Income from land based enterprises		
Produce grown / reared / crafted	£	%
Other land based businesses (courses etc)	£	%
Total income from land based enterprises	£	100%

Expenses for Minimum Needs	
Clothes	£
Travel	£
IT / telecommunication	£
Council tax	£
Food (to meet 65% minimum food need) ¹	£
Total	£

Occupants	
Name	Roles

All our expenditure across all consumption categories is recorded in the ecological footprint calculations.

Contributory criteria

Commentary on progress of contributory criteria:

Land management

Essential criteria

Commentary on species and habitats on site, characteristic landscape features and their management (hedgerows, coppice etc.):

Contributory criteria

Commentary on progress of land management contributory criteria:

¹ A minimum of 30% of basic food needs of all occupants are grown and /or reared on the site, with the remaining 35% of food needs purchased or bartered using the income or surplus produce from other produce grown and /or reared on the site

Energy, water and waste

Essential criteria

Quantity of non-renewable fuels used and what it was used for:

Did waste handling comply with Environment Agency guidelines?

Contributory criteria

Commentary on progress of energy, water and waste contributory criteria:

Zero carbon buildings

Essential criteria

Commentary on progress of buildings and achievement of relevant regulations and zero carbon requirements:

Contributory criteria

Commentary on progress of zero carbon buildings contributory criteria:

Community impact assessment

Essential criteria

Commentary on community impacts:

Commentary on the implementation of mitigation measures to address any negative impacts:

Contributory criteria

Commentary on positive community impacts:

Transport assessment

Essential criteria

There is a significant reduction in transport impacts from all activities on site in comparison with 'typical' levels for the number of occupants and activities on site.

1. Annual monitoring of all trips to and from the site by purpose, distance, mode, and any transport sharing.

Distance and trips to/from site (1 trip is defined as a one-way journey for a single purpose)			
Mode	Domestic Trips - Mileage	Business Trips - Mileage	Notes
Single occupancy car			
Car sharing			
Public Transport			
Active Travel			
Total			

2. Annual assessment of the transport impact of the site against the Transport Assessment Strategy and Travel Plan.

Activities	Transport impact <i>[This will include narrative about impact compared to the average data and Transport Assessment & Travel Plan]</i>
Residents	
Enterprise	
Visitors	

Contributory criteria

Commentary on progress of transport contributory criteria:

Personal Ecological Footprint

Commentary on progress of changes made since the previous year that are likely to increase or decrease the Personal Ecological Footprint :

Ecological Footprint per person (adjusted for inflation): ____gha (supplied on years detailed below)

Additional submissions

A revised management plan will be provided every 60 months, with an interim Ecological Footprint Analysis submitted 36 months after each management plan.

Additional Submission	Included in this submission? Y/N	Next submission due
Ecological Footprint Analysis (EFA)		
Management Plan including EFA
