

Skewen Cricket & Football Club

Proposal to Change Existing Female Toilet to Disabled Toilet with Baby Changing Facilities

Notes:

1. The proposed area consists of a sink and toilet and is currently designated as the Female toilet area.
2. Due to rapid growth of female sport within the club we find that existing facilities no longer cater for the current numbers of female members and visitors. We also cannot cater for disabled persons in the form of toilet and hand-washing facilities.
3. In conjunction with the proposal to install 3 X Female toilets contained in this planning application the existing female toilet will be converted into a dedicated disabled toilet also with baby changing facilities.
4. The disabled facility will be fitted with a 'outward opening' door for wheelchair manoeuvrability.
5. Electric hand drying facilities will be part of the design
