Skewen Cricket & Football Club Planning Application – January 2026

Dear Sir / Madam,

We wish to apply for planning permission (if indeed needed) to allow the following upgrades to be made to our sports facilities:

1. Due to the increase in female participation in both cricket and football in 2025, our existing female toilet facilities are limited and longer cater for female numbers. We only have 1 female toilet which, during busy periods, is insufficient. Our proposal is to convert an existing area within the club to accommodate a further 3 female toilets with handwashing and hand drying facilities.
2. We do not have disabled toilet facilities available at the club and wish to convert the existing (above mentioned) female toilet area into a unisex disabled toilet facility. In addition, we wish to install baby changing facilities within the existing female toilet area, as shown on the plan view.

At this stage we do not know if planning permission is required to allow the above upgrades to happen and would therefore be obliged if NPT Planning Department could advise, as require.

I look forward to hearing from you and remain,

Yours Faithfully,

Chris Cook
